DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to power tool and shield combination, classified in class 144, subclass 154.5.
- II. Claims 22-24 drawn to shield subcombination, classified in class 81.
- III. Claims 25-32, drawn to router tool with a depth adjustment combination, classified in class 144, subclass 136.95.
- IV. Claims 33-40, drawn to router tool with a handle having a grip combination, classified in class 81, subclass 489.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as evidenced by claim 1. The subcombination has separate utility such as use with any power tool and is not limited to the power tool of Group I; accordingly the inventions are separable and distinct.

Art Unit: 3725

Inventions of Groups I, III and IV are related as separate combination, as noted above by their differing characteristics (depth adjustment, hand grip). Inventions of Groups I, III and IV do not rely on the particulars of either of the other inventions for their practice. Additionally, the invention of Group I has separate utility from that of Groups III and IV. Accordingly, the inventions are separable and distinct. (MPEP § 806.05(c)).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and because the search requirements for the inventions of Groups I-IV are not the same, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
